Art Unit: 1626

DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 38 and 71 to 181, drawn to a method of synthesis of a chemical compound of formula A-B-C, classified in classes 534, 536, 540, 544, 546, 548, 549, 558, 560, 562 and 564, various subclasses.
- II. Claims 30 to 69, drawn to a method of synthesis of a chemical compound of formula $(A-B-C)_x-P-E_y$, classified in classes 534, 536, 540, 544, 546, 548, 549, 558, 560, 562 and 564, various subclasses.
- III. Claim 70, drawn to a method of synthesis of a chemical compound of formula $(A-B-C)_x-P$, classified in classes 534, 536, 540, 544, 546, 548, 549, 558, 560, 562 and 564, various subclasses.

The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I, II and III prepare different compounds that contain moieties A, B and C and optionally P (polymer) and/or E (enzyme).

Art Unit: 1626

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims 1 to 181 are generic to the following disclosed patentably distinct species:

MTLJ-1-Foscarnet (page 25),

YY99811-1-Foscarnate (page 36),

Compound 29 (page 50),

Compound 32 (page 53),

The compound on page 58, line 3,

Compounds 24a, 24b, 24c, 24d, 24e and 24f (pages 151-152).

The species are independent or distinct because the species are structurally different and comprise different A, B, C, P and E moieties. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are

Art Unit: 1626

generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on

Art Unit: 1626

the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fiona T. Powers whose telephone number is 571-272-0702. The examiner can normally be reached on Monday - Friday 8:00 AM to 4:30 PM.
